PROJECTS.

OneStop IITG

UI/UX

Researched and designed a feature add-on for a campus app, keeping in mind the needs and expectations of students in the campus; made wireframes, mockups, task flows and built the final mockups.

OzCHI Student Design Challenge, 2019

HCI

Solved a real-world research problem, developed a concept video of 2 minutes, drafted a paper explaining the design process and concept, and created a design journal blog which captures design process, ideas and rationale for design decisions, all under 24hrs.

No Dues Portal

UX

Conducted and analyzed user research. Designed a portal for final year students as well as professors and lab instructors, through user empathy; created Information Architecture, site maps, wireframes, and user flow.
